1) Introduction

2) Executive Summary

3) Total Crime

The above graph shows the total crime reported in eThekwini in the past 10 years. One can see that the crime in eThekwini was highest in 2003/04 (192015) but four years after it dropped and it was 157499 in 2007/08. However in the following year, 2008/09 it lightly increased to the total of 162156 reported cases and the years after also showed slight increase with year 2012/13 having 180878 crime reported.

Highest Crime Rates

The 12 stations with the highest total crime rate per 100,000 persons are listed in Table 3.1.

<table>

When looking at the total crime rate per 100,000, Durban central seem to be the highest with the total crime for both 2012/13 (33357.40) and 2011/12 (32506). With the other areas there has been much change over the year however Pinetown has increased a lot by increasing from 10599.78 (2011/12) to 12000.54 (2012/13). Brighton beach though it’s in the list of high rate but it has managed to decrease from 10373.96 (2011/12) to 9850.66 (2012/13).

</table>

For the top 10 list of the areas with highest crime, Durban Central came the first in both years with the total of 15929 (2011/12) and the total of 16346 (2012/13). Other areas in the list have also increased sighted with Pinetown increasing a lot from 94069 (2011/12) - 10649 (2012/13). This shows that in most stations the crime reported is increasing rather than decreasing.
Map 1: Total Crime Rate

The above map portrays clear the areas with high rate. What is more interesting is the closeness of the areas with high rates, for example Durban central, Umbilo, and Point. If one moves to the west areas, one can see Pinetown, Westville, and Amid Mayville being the highest.
Howevger the further you move from inner city and form the west one can see the decrease to the rate of crime which might be due to the less population found in those areas.

4) Contact Crime

The above graph shows the total contact crime over 5 years. Contact crime includes Murder, Sexual crimes, Murder, Assault and Robbery so this graph gives the total of all that. In 2008 the contact crime was at the highest with 57409 reported cases which dropped dramatically in 2010/11 to 50111 and from 2011/12-2012/13 there has been a slight change of 373.

Table 4.1: Contact Crime

<td>50111</td>
<td>49093</td>
<td>48720</td>
</tr>
</tbody>
</table>

As it is mentioned above, the number of cases reported for contact crime is decreasing. However when looking at each one of the crimes one can see that common robbery has increased from 2011/12 where it was 1352 to 1407 in 2012/13. This is followed by an increase in attempted murder from 1630 in 2011/12 to 1738 in 2012/13. Common robbery and
aggrivated robbery also showed an increase over 2011/12 to 2012/13. The other crimes showed a decrease over the years.

**Highest Contact Crime Rates**

The 12 stations with the highest contact crime rate per 100,000 persons are listed in Table 4.2.

</table>
| Map 2: Total Contact Crime Rate 2010-11

When looking at the above list again Durban central makes it to the top but however one needs to bear in mind that even though there are many people who come in the CBD but the population counted here is for those residing in the city. Umbilo on the other hand made an almost double increase in rate from 3176.71(2011/12) to 6336(2012/13). Pinetown also made an almost double increase from 2311.31(2011/12) to 4103(2012/13). Isipingo is the only one that showed a decrease where the rate in 2011/12 was 2101.13 to 2091 in 2012/13.
The above map shows the high concentration of contact crime rate in Durban central and point and Umbilo. This is also followed by Pinetown and then when you move towards the outer city the rate decreases.
When it comes to the number of reported sexual crimes one can see from the above graph that it has decrease over the 5 years but with a minimal change. In year 2008/09 the total sexual crimes were 6207, this followed by a decrease in 2009/10 of 5809 which continued as there's 4984 cases reported in 2012/13.

<td>138</td>
</tr>
</tbody>
</table>

The above tables shows the top 10 list of stations with highest rate per 100 00 people. Durban Central had the highest rate for year 2011/12 (1073) and also year 2012/13 showed an increase to 1175. The other stations that recorded an increase were Umbilo which had a total of 448 in 2011/12 to 559 in 2012/13, NtuZUma which increased from 191 in year 2011/12 to 196 in year 2012/13. The other stations showed a slight decrease with Point having the highest decrease of 87 rates.
From the above map it is clear that Durban Central is the highest followed by Umbilo and Belliar forming a concentration in the inner city. With other crimes the decrease was seen as moving outwards of the city, however in the above map it is different as areas like Umkomass, Mpumalanga, Inanda, Verelam, Tongaat are amongst the ones with high sexual crimes.
5) **Murder**

![Graph showing total murder cases from April 2008 to March 2013.](image)

Murder is one of the crucial crimes in South Africa, however in the above graph it shows that reported cases have decreased in the past few years. In year 2008/09 the total murder was 2046 which dropped to 1388 in 2010/11. This is however changing as there is a steady line from 2010/11 to 2012/13 which also shows an increase to 1407.

</tr>
<tr>
<td>Inanda (KZN)</td>
<td>Total 157</td>
<td>48</td>
<td>Total 170</td>
<td>52</td>
</tr>
</tbody>
</table>

The table of murder rate shows the top 10 stations with Mpumalanga being the highest in the year 2012/13 and has showed an increase since in year 2011/12 it has a rate of 68. Durban Central and Ntuzuma are the only stations in the list which showed a decrease in rate form 2011/12 to 2012/13. The other stations have slightly increased with Kwa Ndengezi almost making the double increase from having rate of 37 in 2012/11 to 62 in 2012/13.
In the above map it is clear that Mpumalanga and Hammarsdale have the highest rate. This also includes KwaMashu, Durban Central and Isipingo which are far apart. The more one move towards the city the rate decrease except for Cato Manor and Durban central. However the outer parts have high rate. There is a low rate concentrated in Westville, Mayville, Belliar, and Bayview and Berea.
6) Robbery with aggravating circumstances

Robbery with aggravated circumstances per 100 000: 2010/11

From the above graph the trend of the line seems to be same as that of Murder crime whereby there is a drop of crimes reported but which also tend to increase a bit later. In 2008/09 the total robbery recorded was 16270 this dropped to 11257 in 2010/11. In the 2011/12 there was also a slightly drop which also showed an increase of 11356 in the year 2012/13.

<td>169</td>
<td>378</td>
<td>259</td>
<td>580</td>
</tr>
</tbody>
</table>
When looking at top 10 list with highest rate of Aggravated Robbery, Durban Central seem to be at the bottom of the list again, this may be due to lots of activities done in the city thus people get the opportunity to rob others. However though it is in the top list but the rate has decreased from 1886 in 2011/12 to 1806 in 2012/13. Pinetown is the second in the list and it has shown a dramatic increase over a year period increasing from 799 in 2011/12 to 1147 in 2012/13.
The areas around the inner city seem to be the ones with high rate of aggravated robbery. this create a concentration in areas like Belliar, Umbilo, Westville and Pinetown. The reason for this may be because most of the areas there have working offices so robbers see it as an opportunity especially in Durban central where it is always busy.
7) Property-Related Crime:

In the above graph is the total for all property related crimes. This includes burglary at business premises and residential premises, Theft of motor vehicle and motorcycle and also out of or from motor vehicle and stock theft. From the above total one can see that the property related crimes are increasing since 2008/09 (36625). From 2009/10 to 2010/11 there has been a slight drop since it went from 39460 to 39398. However this was followed by a high increase since in 2012/13 the total recorded is 45460.

Table 8.1: Property Related Crimes

<table>
<thead>
<tr>

<td><strong>39,460</strong></td>
<td><strong>39,398</strong></td>
<td><strong>40,966</strong></td>
<td><strong>45,460</strong></td>
</tr>
</tbody>
</table>

The above table shows in details each property crime where burglary at business premises has been seen dropping from 2008/09 (5017) to 2011/12 (4587). However in 2012/1 the crime reached a total of 5116 which is also high than that of 2008/09. Burglary at residential premises on the other hand has increased dramatically over 5 years rising from 15698 in 2008/09 to 22019 in 2012/13, this is why most people don’t feel safe in their homes and feel they need to tighten up the security. Theft out of or from motor vehicle and stock theft has also showed
slight increase of the years. Theft of motor vehicle and motor cycle is the only crime in this group which is showing a decrease in these past years. It went from 8730 in 2008/09 to 6926 in 2012/13 which could be a result that now cars can be easily tracked thus making it difficult to be stolen.

</table>

When looking in the above list we see the stations with the highest reported cases. In the list Pinetown seem to be having the highest number of reported cases in both years and it is increase because in 2011/12 it had 3109 reported cases and in 2012/13 it had 3712 cases. Umbilo also increased from 2404 in 2011/12 to 2767 in 2012/13. Umlazi has also increased since it went from being number 10 in the list of 2011/12 to being number 7 in year 2012/13. Hillcrest and Berea are the ones that showed a decrease with Hillcrest having the highest decrease of 221 in total.
In the above map it is clear that May may have the highest rate maybe because it is an industrial area with lots of business property. There is also a high concentration in Pinetown, Westville Belliar, Umbilo and Durban Central which tends to decrease as one move away from the city.
Burglary at the business premises has decreased from having a total of 5017 in 2008/09 to 4587(2011/12). However in 2012/13 the total of reported cases saw a significant rise to 5116 which is also more than than of 2008/09. The reason for these is that maybe there are many business premises now then before.

**Highest Reported Cases: Burglary at Business Premises**

<table>
<thead>

</tbody>
</table>

The above list shows the stations with the highest cases reported for burglary at business premises. In 2012/13 Pinetown was the highest with the total of 715 cases but in 2011/12 it was the second on the list with the total of 491. Durban Central have also increased from 537 in 2011/12 to 599 in 2012/13, this also includes Umlazi and Chatsworth. Umbilo, Greenwood...
Park, Hillcrest and Berea are amongst the stations which have experienced the decrease from year 2011/12 to 2012/13.

From the above map one can pick up the concentration belt of crimes reported being high from Durban North, Phoenix, Inanda and Hillcrest and also have some high total in Umbilo, Chatsworth, Umlazi and Berea. The hotspots are pine town and Durban central and this is because of the industrials and other businesses found there.
9) **Burglary At Residential Premises**

Unlike the burglary in business premises the one in residential premises seems to be increasing as from 2008/09 where it had 15698 totals of reported cases to 18275 in 2009/10. However in 2010/10 there was a slight drop to 18005 but it was followed by dramatic increase in 2011/12 which recorded a total of 19493. In 2012/13 there was also another increase to a total of 22019 which is much worse than the situation in 2008/09.

When looking at the for residential premises cases. Westville seem to be in the lead in the year 2012/13 with the rate of 8557 and also in 2011/12 it was the highest with the rate of 8535. Bellair also increased slightly from 6848 in the year 2011/12 to 7241 in the year 2012/13. Amanzimtoti, Umbilo, Pinetown, Malvern (almost double increase), Durban north, Bayview
and Montclair are amongst the stations which have showed an increase in rate over a year period. Hillcrest is the only one in the list which has a decrease in the period of a year where it went from a rate of 3865 in year 2011/12 to 3260 in 2012/13.

</tbody>
</table>

In the above list for the highest reported cases for Burglary at residential premises, Pinetown is again in the top list and it has increased form a total of 1305 in 2011/12 to the total of 1375 in the year 2012/13. All of the other stations in the list have also increased a lot over a year period. The only station that has shown a decrease is Hillcrest which went from the total 1201 reported cases in 2011/12 to 1013 in 2012/13.
From the above map, Westville, Belliar and Mayville are at the hotspot for the highest rate for Residential burglary. They are followed by Durban North and Amanzimtoti which are along the coast. Pinetown, Malvern, Bayview and Umbilo make a concentration of high rate in the inner city which decreases as one move in the outer part of the city.

10) **Public Opinion Survey:**
Residents are asked if they had been victims of crime during the annual Quality of Life Survey, as is outlined in Figure 11.1.

From the survey conducted annually people are also asked about their experiences in crime. The above graph shows the trend of the crime victimization of the residents being interviewed. From 2003/04 there has been a drop of 10%, this continued till 2006/07 where it reached 20% which is a 15% drop from 2009/04. However in 2007/08 there was an increase of 4.8% but which dropped again in the following years till 2012/13 where the percentage of victims is at 14%. 2009/10 and 2010/11 showed no change hence creating a steady trend line there.

Safety in eThekwini when Walking:

</tbody>
</table>

Residents were also asked how safe it is to walk where they live during the day. From the above table one can see that most residents feel safe to walk during the day and the percentage has been increasing from 2006/07 where 67% felt safe to 2009/10 where over 80% resident felt safe. In year 2010/11 it dropped a bit and also year 2012/13 experienced another dropped to 77%. This made residents feeling unsafe to increase up to 23% in the year 2012/13.

</tbody>
</table>
Taking a walk at night is not the same as doing as in day time, simple because in the dark you can’t see clearly thus can’t defend yourself from danger. In the past years the number of residents who felt safe walking at night has been decreasing with more people feeling unsafe. In 2006/07, only 33% felt that they are safe walking at night and just over 60% said they feel unsafe. This is followed by a further decrease till 2008/09. In 2009/10 the percentage of people feeling safe walking at night started to increase to 38% which saw a further increase of 7% in two years after. However in year 2012/13 almost 70% of the residents felt unsafe walking at night, which made residents who said they feel safe to drop to 30%.

Safety in eThekwini when at Home:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

The above table shows a percentage of how safe do people feel at home in the day. The results were more the same as walking in the day as more people felt safe at home in the day. This has increase because in year 2006/7 the percentage of those feeling safe was 70% and it went up to being 87% by year 2009/10. However as from 2010/11 there has been a slight drop of percentage and in 2012/13 it in 77%. This has automatically increased the percentage of residents feeling unsafe at home in the day to up to 33% in the year 2012/13.

<table>
<thead>

<td>100</td>
<td>100</td>
<td>100</td>
<td>100</td>
<td>100</td>
</tr>
</tbody>
</table>

Residents feeling safe at home at night are lesser than those feeling safe at home during the day. From the above table one can see that only 49% of residents felt safe in 2006/07, resulting in over 50% other residents feeling unsafe. This however changed in the following two years as there was a decrease of percentage of residents feeling safe at night which dropped by 10% from the 49 % it was in year 2006/07. This made the percentage of those not feeling safe to be above 60%. However in the following year it dropped to 49% making the percentage of those feeling safe to increase again in 2009/10 and also in 2011/12. Year 2012/12 also experienced another drop of percentage for those feeling safe leaving 58% of other residents saying they feel unsafe in their homes at night.
Areas considered most unsafe

<tr>
<td>Savannah Park</td>
<td>Durban north</td>
</tr>
</tbody>
</table>

The residents were then asked which areas they feel are most unsafe in the eThekwini Municipality. KwaMashu came at the top of the list followed by Durban central and Umlazi. However when looking at the list produced by SAPS Stats KwaMashu is at the bottom but Durban Central is at the top and so is Umlazi and Chatsworth. This then shows that there is a collaboration of how people feel unsafe in certain areas and the number of crimes reported in those areas.
