SOLID WASTE

As a COP17 delegate, you alone could produce up to 4kg of waste per day, or 4 1/2 rubbish bins of waste during COP17!

Use recycling bins and be a responsible consumer and help reduce the ecological footprint of this COP17 event.
During COP17, the food you will consume is expected to require 1 football field of land to produce.

Please reduce food wastage and help reduce the ecological footprint of this COP17 event.
During COP17, you could use up to 795 sheets of paper = 1.25 plantation trees!

Please use paper sparingly, remember to recycle, and help reduce the ecological footprint of this COP17 event.
WATER

During COP17, you could use 975 litres of water a day = the same as standing in the shower for 65 minutes!

Please use water sparingly and help reduce the ecological footprint of this COP17 event
WASTE WATER

During COP17, you could produce

939 litres of wastewater per day = 12 bathtubs of wastewater!

Please use water sparingly and help reduce the ecological footprint of this COP17 event.

COP17/CMP7
