

DSW Offers a Range of Products & Services

Wheeled Containers:

DSW has successfully introduced the wheeled refuse container to small and medium volume customers as a more hygienic receptacle for solid waste. The containers are cleared on pre-determined days, arranged in consultation with our customers. There are two sizes of wheeled containers available: the 240 litre container and 600 litre.

Skips / Containers for Bulk Refuse:

Skips are steel containers used for the storage of high volume compactable waste and uncompactable bulky refuse. We are able to offer skips with capacities ranging from 5.5 cubic metres to 27 cubic metres.

Compaction Unit:

DSW provides a collection and disposal service where our specialised vehicles transport client-owned compaction units to our landfill site.

Special Events:

DSW provides refuse removal services at all kinds of major events including marathons, company sports days, school fetes, fun runs, etc. Our service for these events include a combination of ethnic drum, bags, wheelie bins, skips, bin liners recycling, thus enabling the event organisers to host a clean, environment friendly function.

Recycling

DSW's comprehensive waste management package include:

- Recycling on site
- Separation at source
- Provision of recycling receptacles
- Provision of statistics
- Maintenance of waste area
- Collection of recyclables
- Washing of bins
- Site Management

Please note that in terms of the municipal bylaws every business must have a registered refuse removal contractor managing its waste. For customised service and advice please contact DSW on
